

Medicare Coverage Review

IDET /ANNULOPLASTY– Was awarded a CPT code in Jan 2007

22526 single level, IDET or Annuloplasty

22527 Additional levels

FCSO considers these “A” codes which means they are good codes, but at present they remain non-covered. They do this so they can track and trend data before committing dollars.

Sacroplasty is currently an “N”, non-covered code. But since the letter sent by Dr Tracy, it has been awarded recognition, which means they recognize the procedure and will decide what to do, that is, consider this procedure to be a Vertebroplasty or to give it a new code, or let it continue as an “N” code.

Sacroplasty – use CPT 22899 - Unlisted Procedure Spine

Biacuplasty – is considered an experimental procedure, clinical efficacy and safety unrecognized

CPT 0062T, 00623T
